

Quantyx AI — Demo transaction dataset

Companion files: quantyx_demo_full_suite.csv, quantyx_demo_full_suite.xlsx, demo_upload_validation_errors.csv. Exercises list filters, bulk upload, and analytics. Use API-created transactions for async fraud/ML on each row.

Required CSV columns

account_id, amount, currency, transaction_type, transaction_date. Optional: status, description, merchant_id, category_id.

Coverage

Types debit/credit/transfer/refund; statuses pending/completed/failed/reversed; USD, EUR, GBP, INR; velocity, night-hour, and spike-friendly rows.

Sample (first 12 rows)

account_id	amount	currency	transaction_type	status	description	transaction_date
1	1200.00	USD	debit	completed	Grocery debit baseline 0	2026-01-15 12:00:00
1	1300.00	USD	debit	completed	Grocery debit baseline 1	2026-01-18 12:00:00
1	1400.00	USD	debit	completed	Grocery debit baseline 2	2026-01-21 12:00:00
1	1500.00	USD	debit	completed	Grocery debit baseline 3	2026-01-24 12:00:00
1	1600.00	USD	debit	completed	Grocery debit baseline 4	2026-01-27 12:00:00
1	1200.00	USD	debit	completed	Grocery debit baseline 5	2026-01-30 12:00:00
1	1300.00	USD	debit	completed	Grocery debit baseline 6	2026-02-02 12:00:00
1	1400.00	USD	debit	completed	Grocery debit baseline 7	2026-02-05 12:00:00
